Message from the President and Chief Executive Officer and the Chairman of the Board

We are delighted to share with you the Lifespan annual report for fiscal year 2017. It highlights some of our most notable achievements of last year and provides a look forward as we advance our mission of [*Delivering health with care.*](#)

As the leading health care system in the state and the region, we have taken a bold look into the next five years and are refining our focus on specific areas of strategic importance to ensure Lifespan's continued success in the challenging, ever-evolving health care landscape. Improving patient access, strengthening our physician partnerships, engaging our workforce, expanding services to meet the needs of our community, and pioneering the transformation of care delivery are among the several priorities described in our strategic plan that will carry us through 2022.

In addition, Lifespan and GE Healthcare announced [a unique partnership](#) this past December that will help us reimagine how we deliver health with care and create new models of care delivery that can be replicated across the country. Over the next six years, GE Healthcare (in partnership with Lifespan) will bring advanced analytic capabilities and simulation modeling that will aim to

improve patient flow, enhance our efficiency and capacity, optimize how we manage our human capital, develop a system-oriented imaging strategy and, as a result, improve the quality of care we deliver while controlling the cost of that care.

Finally, we are proud of the recent launch of our new shared values – compassion, accountability, respect, and excellence – four words that succinctly capture the substance of our mission and form the acronym C.A.R.E. This acronym will serve as our “true-north” guide over the next several years, helping Lifespan become the best place for care and the best place to work.

The achievements of the last fiscal year would not have been possible without the tireless efforts of the more than 15,000 individuals who work at Lifespan and the thousands of physician partners who provide care at Lifespan. We extend to them, and to our communities, our heartfelt thanks.

Sincerely,

Timothy J. Babineau, MD
